

Ohio Infection Control Guidelines

The Testing Center is Equipped with biohazard receptacles. Candidates are required to dispose of contaminated materials in these receptacles.

- ▣ Blood Spill Procedures:
- ▣ All non-porous implements which have come in contact with blood or body fluids, shall be disinfected by using an EPA registered disinfectant effective against tuberculocides or HIV/HBV.
- ▣ All porous materials which have come in contact with blood or body fluids shall be doubled bagged and discarded.
- ▣
